

**The Council on Tall Buildings and Urban Habitat** is looking for a talented individual to join our growing team based within the IIT College of Architecture community as an IT/Coding Intern. Become part of the world's leading body in the field of tall buildings and the recognized source of global information on skyscrapers.

This person must have good organizational and graphic design skills, as well as exceptional IT and website coding abilities. The primary task over the next few months will be to develop our international tall building database. The person needs to be exceptionally self-motivated and be able to work both independently and as part of a team. Proficiency in the following systems/programs would be a minimum requirement: [PHP/MySQL](#), [HTML/CSS/JavaScript](#), [DotNetNuke](#), [Microsoft Office](#) and [Adobe Photoshop](#). The internship is approximately 20 hours per week (worked around your class schedule) for the duration of this semester, with the possibility of further employment.

If you would like to take up this challenge, please submit the following information to the CTBUH office in Building 3410, room 112 or by email to [nhollister@ctbuh.org](mailto:nhollister@ctbuh.org) by the deadline of **Monday, September 12<sup>th</sup>**:

1. Brief covering letter explaining why you would be ideal for this role (1 page max), including courses studied, and current GPA.
2. Resume, with evidence of work experience and references.
3. Evidence of a website you have designed or been significantly involved with.

### Timeline

Deadline for submissions:  
**September 12<sup>th</sup> 2011**  
Internship begins:  
**As soon as possible**
