

Living + Working *In Space*

Join astronaut Lodewijk van den Berg for a conversation on his out-of-this-world life and work.

Van den Berg, a chemical engineer and the world's first Dutch-born astronaut, was surprised to be chosen to fly on a 1985 Space Shuttle Challenger mission "due to his age, huge glasses and little strength." At 53 years old, he became one of NASA's "oldest rookie astronauts."

Listen to his inspiring story

1pm | Thursday | June 28, 2012
